

# Accessories Catalog Air-Conditioning Solutions

For trucks, light-duty vehicles, mini and midi buses and specialty vehicles

**2025**

Dear customers, dear Webasto partners,

this Webasto catalog will give you an overview of the complete range of accessories for our air-conditioning systems. On the following pages, you will find everything that you need for installing our rooftop, integrated and transport refrigeration systems. The accessories shown here are clearly laid out to enable you to find and order what you need quickly. Together with the product catalog for heating solutions, catalog will provide a comprehensive source of information so that you can work efficiently with our heating and cooling units.

We wish you great success with our products,

Your Webasto team

# Application of a rooftop air-conditioning system

The main components of the air-conditioning system are accommodated in a compact housing. They can be fitted quickly and easily on the vehicle's roof. Webasto rooftop air-conditioning systems are available in different capacities (4 to 36 kW).

Our rooftop systems and control elements can be found in our separate heating and air-conditioning product catalogs.

- Advantages of rooftop air-conditioning systems**
- Compact design
  - Optimum harmonization of air-conditioning components
  - Quick and easy installation
  - Additional comfort options (heating or fresh air)
  - Proven, high-quality, standard component

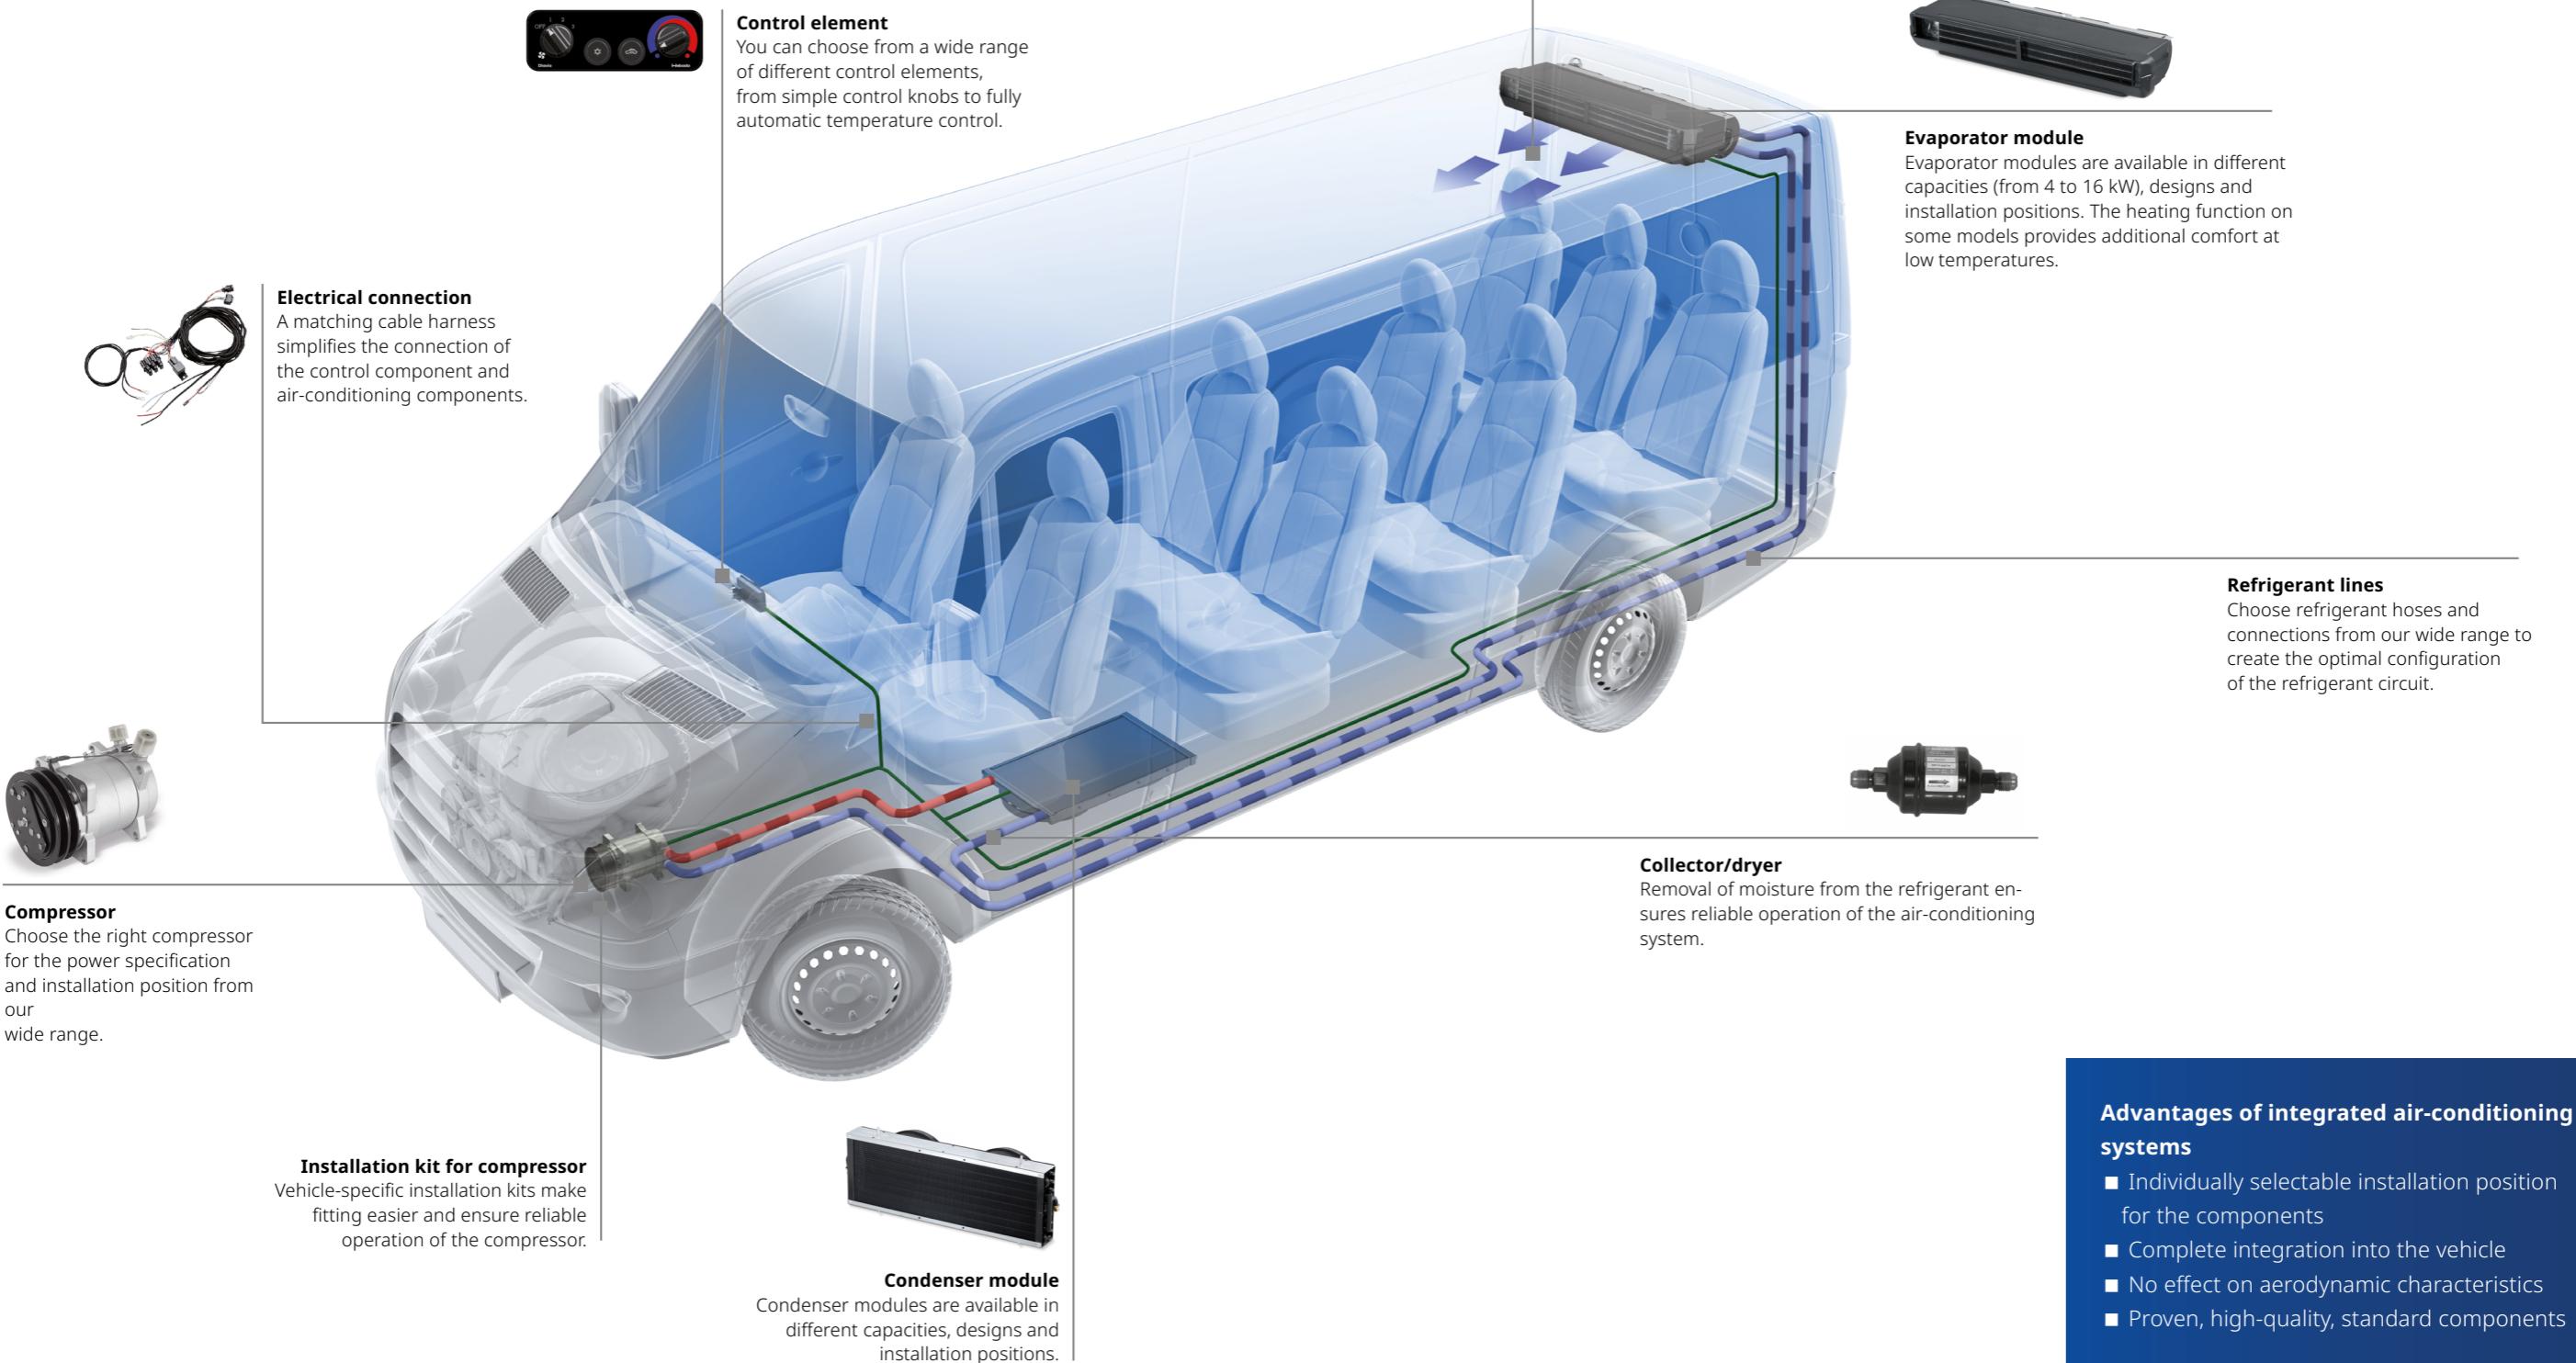

# Application of an integrated air-conditioning system

Webasto integrated air-conditioning systems are available with various capacities (4 to 16 kW).

All the components are integrated into the vehicle and can be matched to individual requirements.

A comprehensive range of accessories makes them easier to install in the vehicle.

Our integrated air-conditioning systems and control elements can be found in our separate heating and air-conditioning product catalogs.

# Installation options for integrated air-conditioning systems

In addition to a large selection of standard products, we offer you individually tailored system solutions. We will implement your chosen modifications according to your requirements, e.g. a particular temperature range or a special position for the air-conditioning components in the vehicle. You can rely on our many years of experience in original equipment and retrofitting.

## Possible positions for the evaporator

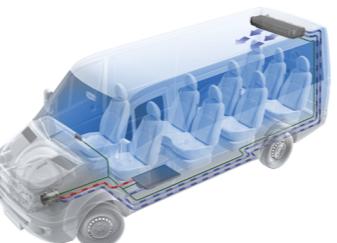

- Under the roof
- Under the dashboard
- Integrated into the roof
- Vertically on the side at the rear
- Vertical
- On the roof

## Possible positions for the condenser

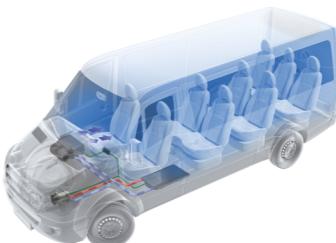

- On the roof
- On the underbody
- At the front of the vehicle

The evaporator and the condenser, the two main components of our integrated air-conditioning systems, can be fitted separately in the vehicle – depending on space requirements and use. The various positions available are shown below.

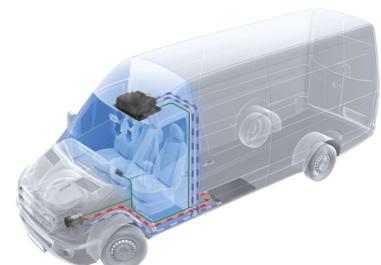

## Condenser mounted on the underbody

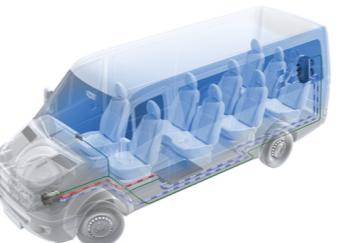

Evaporator under the roof

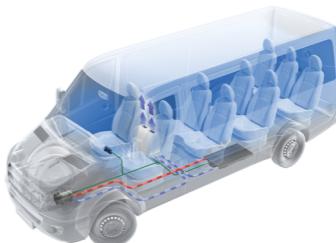

Evaporator under the dashboard

Evaporator integrated into the roof

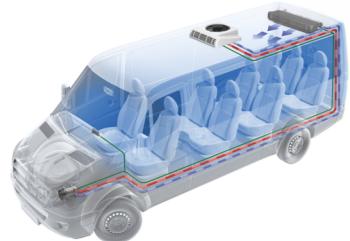

Evaporator vertical on the side at the rear

Rear evaporator vertical

## Condenser mounted on the roof

Evaporator under the roof

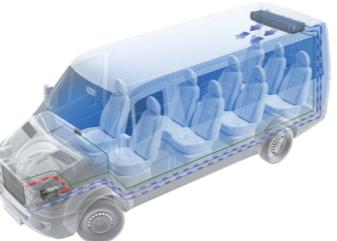

Evaporator under the dashboard

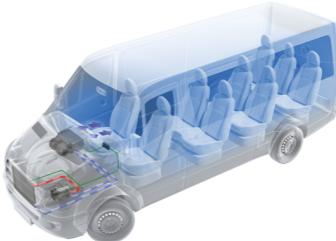

Evaporator integrated into the roof

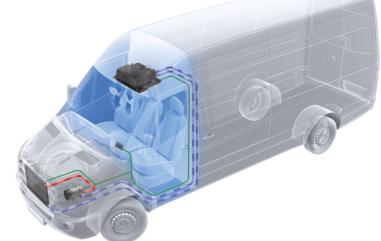

## Condenser mounted at the front of the vehicle

Evaporator under the roof

Evaporator vertical on the side at the rear

Evaporator vertical

# Application of an integrated transport refrigeration system

Our transport refrigeration systems can be found in our separate heating and air-conditioning product catalogs.

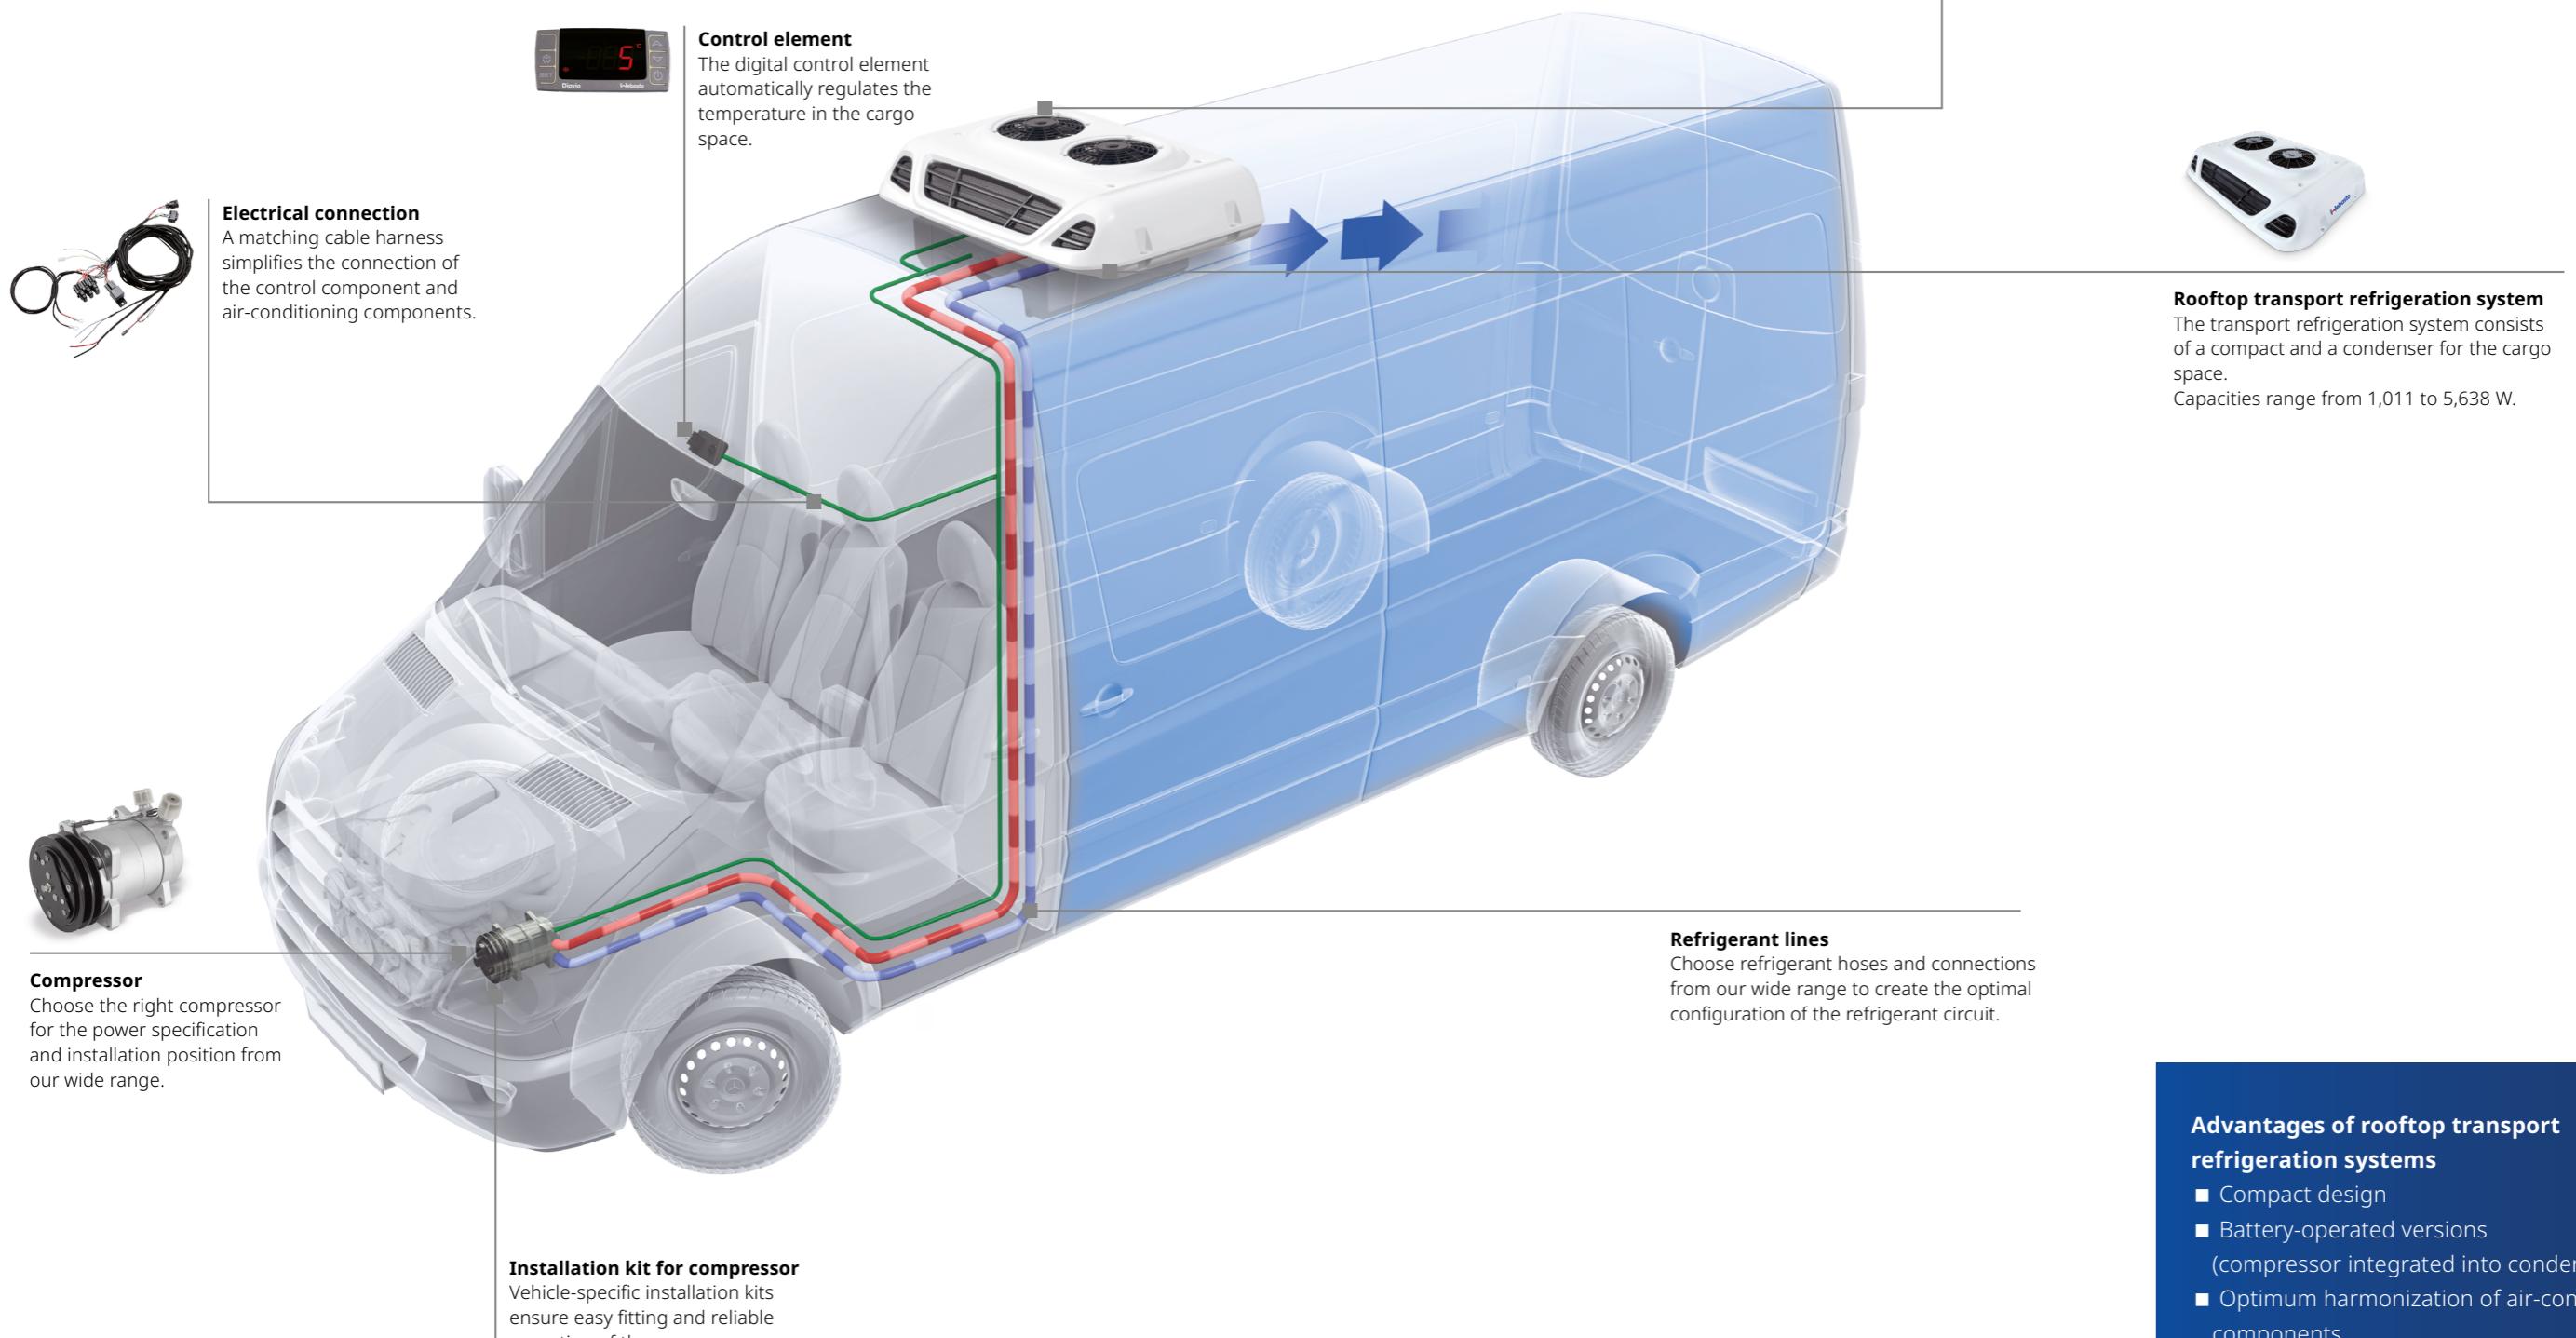

Webasto integrated transport refrigeration systems are suitable for fresh produce delivery ( $> 0^{\circ}\text{C}$ ) and for deep frozen cargo ( $< 0^{\circ}\text{C}$ ). They are available in various capacities up to 3,660 W. An optional standby function allows operation independently of the engine. The system components are fully integrated into the vehicle and can be tailored to the individual application and requirements. Vehicle-specific installation kits are available.

# Application of a rooftop transport refrigeration system

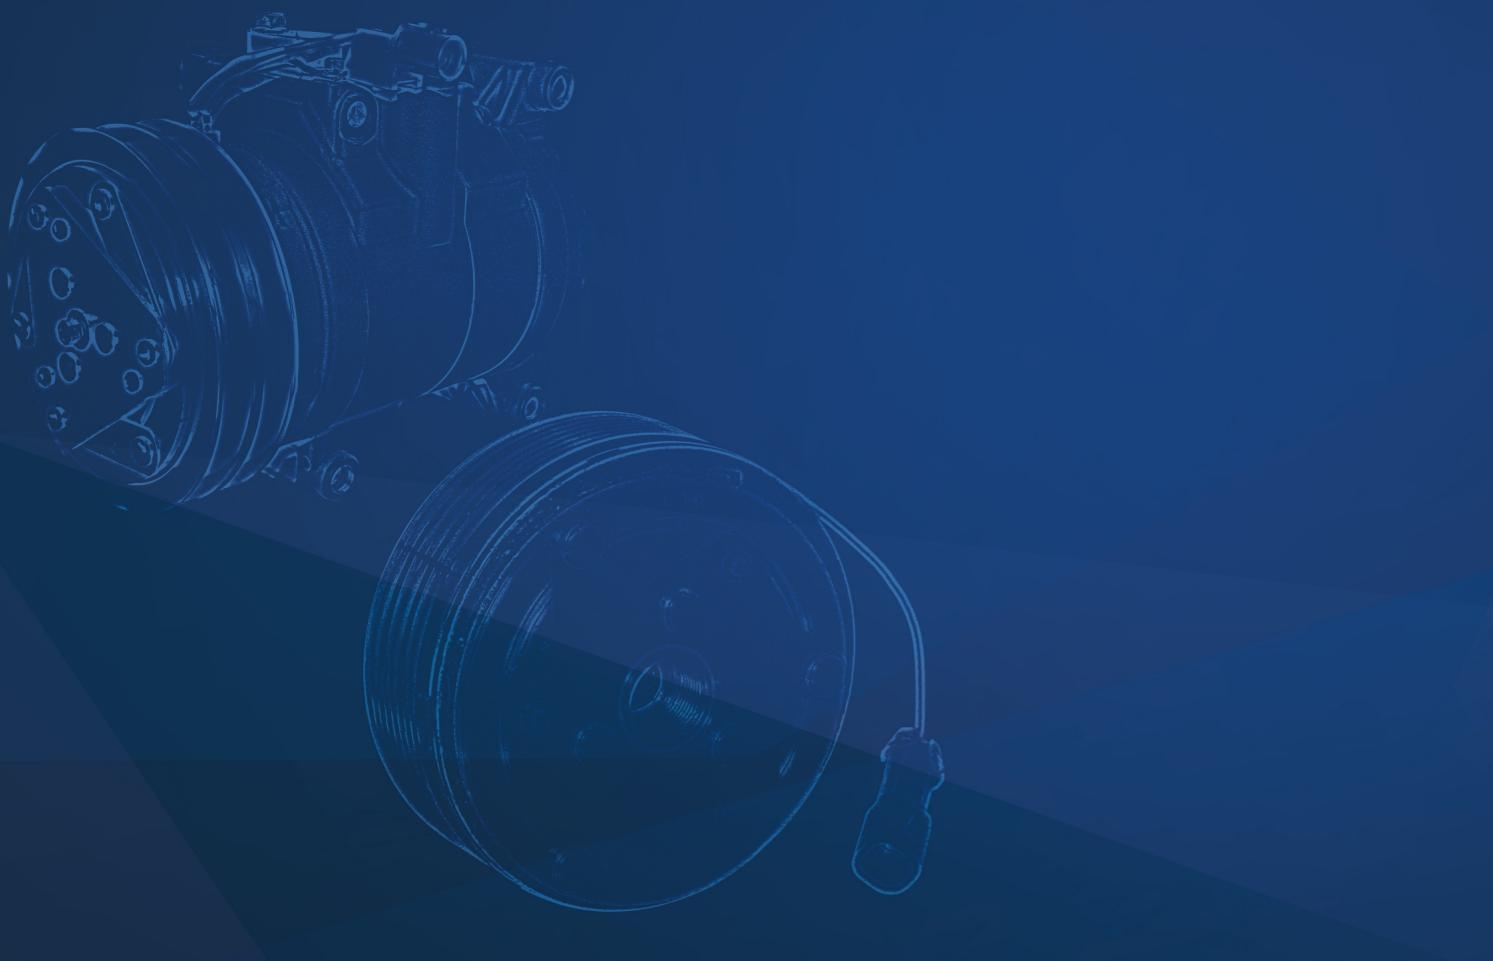

Our transport refrigeration systems can be found in our separate heating and air-conditioning product catalogs.

The main components of the Webasto rooftop transport refrigeration system are accommodated in a compact, aerodynamic housing. The cooling systems, with capacity options ranging between 1,011 and 5,638 W, are suitable for fresh produce delivery ( $> 0^{\circ}\text{C}$ ) and for deep frozen cargo ( $< 0^{\circ}\text{C}$ ). An optional standby function allows cooling independently of the engine.

## Advantages of rooftop transport refrigeration systems

- Compact design
- Battery-operated versions (compressor integrated into condenser unit)
- Optimum harmonization of air-conditioning components
- Quick and easy installation

## Compressors, tensioning

### Compressors

This is the core of the system. It sucks in the refrigerant coming from the evaporator at a low temperature and at low pressure, compresses it and puts it back into the circuit at high pressure and high temperature. Most of performance of the system depends on proper operation of the compressor.

### Tensioning

Power transmission to the compressor. Transmission of power motion to the compressor, from the motor to the electromagnetic clutch pulley, occurs by means of one or more (trapezoidal or Poly-V) belt. In the belt run, besides the tensioning pulleys (idler pulleys pivots and cams), transmission pulleys for other parts, such as water pump, alternator, etc. may be inserted. Compressor mounting kits allow the integration of the compressor in the specific vehicle.

Please contact your dealer or us for the availability of compressor mounting kits for your vehicle.

## Compressors, tensioning Delphi CVC

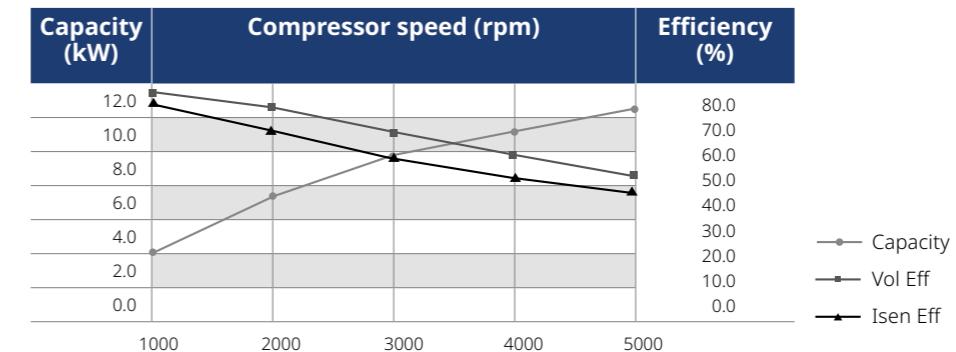

**DELPHI**

Compressors

The next generation of variable displacement piston compressor technology, Delphi's Compact Variable Compressors (CVC), are based on a swash plate simple harmonic motion mechanism. The enhanced mechanism performance makes the CVC adaptable to both pneumatic and electronic controls. Refrigerant R134a.

### Performance

### Technical specifications

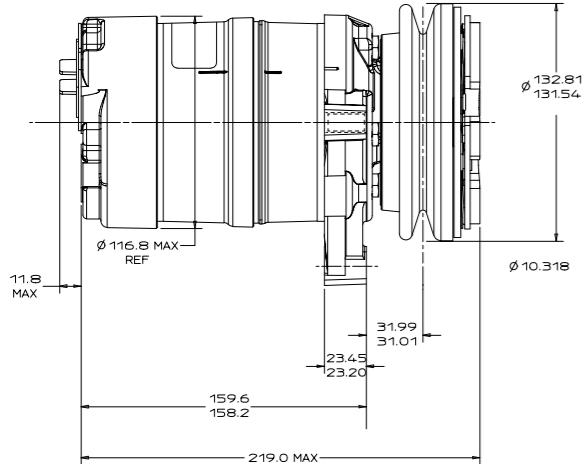

Parameters	Specification
Type	10-cylinder, axial swash plate mechanism
Displacement (cm³)	7 – 125
Dimension (mm)	Length: 195, Diameter: 114
Dry weight (kg)	5.2
Capacity (2,000 rpm)	6,040
Operating speed (rpm)	8,000, maximum continuous 9,200, transient
Refrigerant	R134a

Order number	Type	Quantity (ml)	Color	Description
Oil

## Delphi HD6

**DELPHI**

The HD6 compressor family is a six cylinder, axial-type compressor, 164 cm<sup>3</sup> of fix displacement. Refrigerant R134a.

### Performance

### Technical specifications

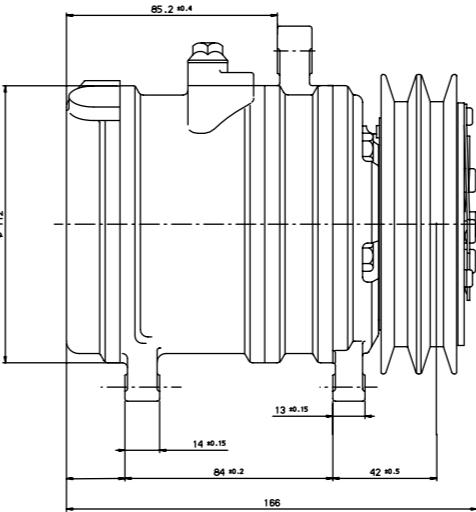

Parameters	Specification
Type	6 cylinder swash plate
Displacement (cm <sup>3</sup> )	164
Oil	MLX 488
Dry weight (kg)	7.38
Body diameter (mm)	116
Max. lenght w/o pulley (mm)	217
Lenght with pulley (mm)	233
Max. width (mm)	159
Refrigerant	R134a

Order number	Type	Quantity (ml)
Oil	PAG ISO 150	250

# Compressors, tensioning

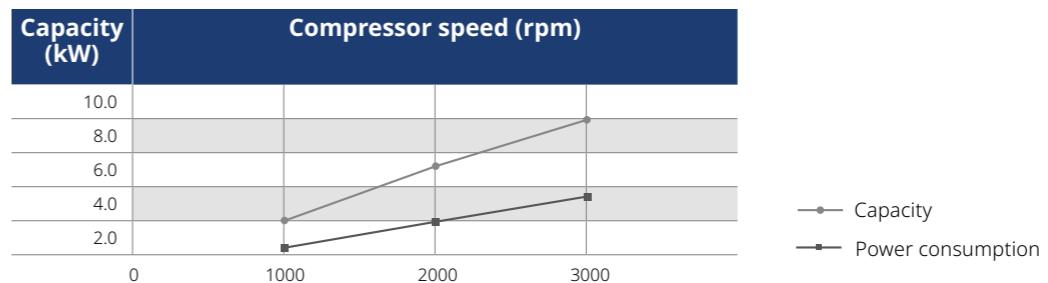

## Delphi SP10

**DELPHI**

These SP10 10-cylinder fixed displacement (110 cm<sup>3</sup>) compressors consist of five double-ended pistons moving in the cylinder bores by a swash plate and shaft assembly. The 10 hemispherical shoes connect the pistons to the swash plate and shaft assembly. As the swash plate rotates, the shoes swivel, remaining in constant contact with the piston and the swash plate. The rotary motion of the swash plate is therefore converted to the reciprocating motion of the piston. Refrigerant R134a.

### Performance

### Technical specifications

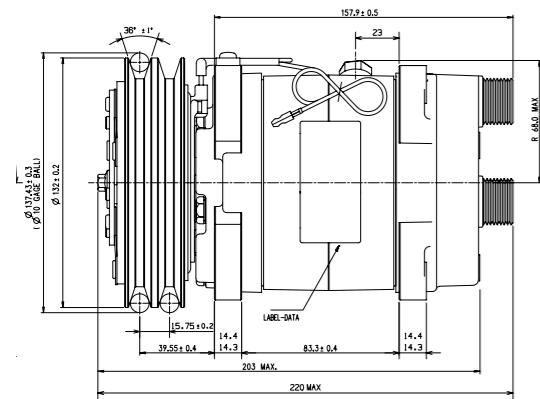

Parameters	Specification
Type	10-cylinder, axial swash plate mechanism
Displacement (cm <sup>3</sup> )	110
Dimension (mm)	Length: 166.0, Diameter: 112
Dry weight (kg)	4.5 (with clutch assembly)
Capacity (2,000 rpm) (W)	6,040
Permissible continuous speed (rpm)	8,000
Rotation	Clockwise
Refrigerant	R134a

Order number kit	Order number	Type	Quantity (ml)	Dimension
Oil	62040595B	PAG ISO 46	250

## Delphi SP15

**DELPHI**

This compressor is equipped with 10 pistons, and it has 154 cm<sup>3</sup> displacement / revolution. The high number of pistons (10) guarantees a minimum of vibration, while the power consumption and the capacity curves are at a very high level. The compressor body is equipped with 8 "ears"; this feature, along with the mounting angle (+/-90°) allows for excellent mounting options. The compressors are available either with Rotalock ports (1" - 14 UNS), or O-Ring ports (3/4" 16 UNF; 7/8" 14 UNF) - see technical table. The Delphi SP15 is interchangeable with the Sanden SD7H15. Refrigerant R134a.

## Delphi SP20

**DELPHI**

The SP20 compressor is equipped with 10 pistons, and it has 210 cm<sup>3</sup> displacement / revolution. The compressor is one of the most reliable on the market and its power and robustness are particularly suitable for commercial and industrial vehicles, tractors, etc. The high number of pistons (10) guarantees minimum vibration and the capacity curves are at a very high level. The compressor body is provided with flanged ports, but it's possible to adapt the ports to O-Ring connections (3/4" 16 UNF; 7/8" 14 UNF) by means of two adapters, supplied in the kits 62A03924 and 62A031056. Refrigerant used R134a.

## Delphi V5

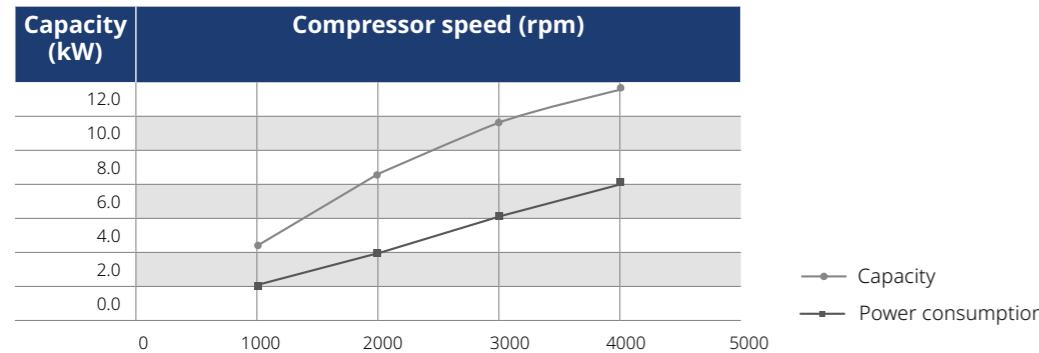

**DELPHI**

The first volume-produced variable displacement compressor, (98 / 151 cm<sup>3</sup>) the five-piston V-5 automatically adjusts displacement to match the vehicle's air-conditioning demand.

A control valve in the V-5's rear head senses evaporator load, and automatically changes displacement to match that load. Refrigerant R134a.

### Performance

### Technical specifications

Parameters	Specification
Type	5 piston wobble plate mechanism continuously variable displacement

## Sanden SD5

This compressor is equipped with 5 pistons, and it has (87 cm<sup>3</sup>) displacement / revolution. The reliability of this compressor is among the highest in the market. The compressor body is equipped with 8 "ears"; this feature, along with the mounting angle (+ / -90 °), allows for using the best mounting options.

This SD5H09 compressor, is the version for R134a. The SD5L09 compressor is for R404A version. The compressors are available with O-Ring ports (3/4" 16 UNF; 7/8" 14 UNF) – for more details, please see the technical table.

**Performance SD5H09 (R134a)**

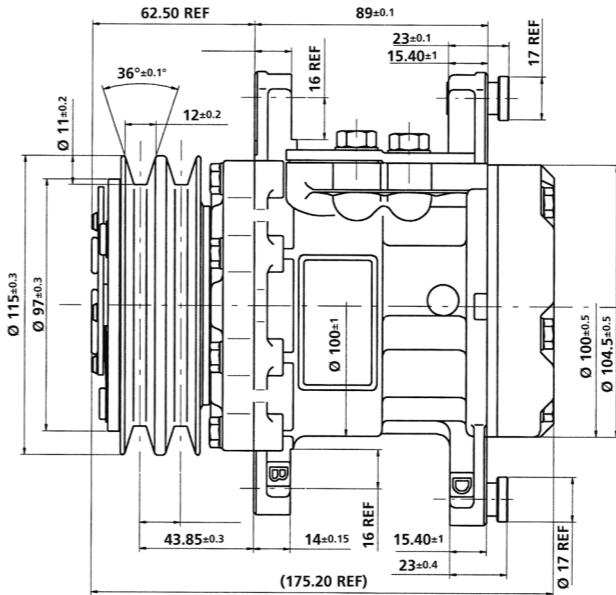

**Technical specifications SD5H09 (R134a)**

Parameters	Specification
Piston diameter (Ø mm)	35
Stroke (mm)	18.07
Displacement (cm <sup>3</sup> )	87
Number of cylinders	5
Permissible max. speed (rpm)	7,500
Permissible continuos speed (rpm)	6,500
Lubricant charge (cm <sup>3</sup> )	100
Rotation	Clockwise
Refrigerant	R134a

Order number	Type	Quantity (ml)
Oil	PAG ISO 100 for SD5H09 (R134a)	250

## Sanden SD7B10

This compressor is equipped with 7 pistons, and it has 99 cm<sup>3</sup> displacement / revolution. The reliability of this compressor is among the highest in the market. The compressor body is provided with 4 "ears"; this feature, along with the mounting angle (+ / -90 °), allows for taking advantage of the best mounting options. This SD7B10 compressor, is the version for R134a refrigerant, of the old type SD706 (for R12), so its dimensions are small and it is lightweight. The compressors are available with flanged ports.

**Performance**

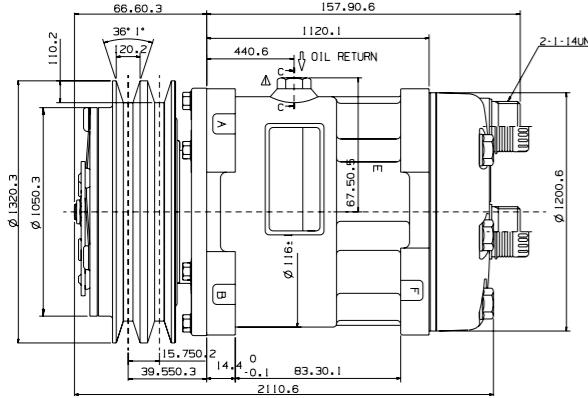

**Technical specifications**

Parameters	Specification
Piston diameter (Ø mm/inch)	25.4/1

## Sanden SD7H15

This compressor is equipped with 7 pistons, and it has 154 cm<sup>3</sup> displacement / revolution. The reliability of this compressor is among the highest in the market. The compressor body is equipped with 8 "ears"; this feature, along with the mounting angle (+/-90 °), allows for using the best mounting options. This SD7H15 compressor, is the version for R134a refrigerant, of the old type SD709 (for R12). The compressors are available with Rotalock ports (1" - 14 UNS), but also with O-Ring ports (3/4" 16 UNF; 7/8" 14 UNF).

# Compressors, tensioning

Seiko Seiki

These Seiko Seiki compressors are characterized by a very light structure, compact size and flexible capacity control. They also generate very little noise, which is useful in the cases in which those characteristics are more important than the power. The quantity of oil in the refrigerant is very reduced, so the performances of the heat exchangers are completely used. These compressors use a vane rotary mechanism; the displacement is calculated adding the single refrigerant volumes moved by the vane rotary mechanism during the suction phase – 1 turn of the rotor inside the compressor. This displacement is named "Equivalent displacement". The displacement of SS10 compressor is 96 cm<sup>3</sup>.

## Performance

## Technical specifications

Parameters	Specification
Type	Oval type vane rotary
Displacement (cm <sup>3</sup> )	96
Number of vanes	5
Permissible continuous speed (rpm)	800 - 8,000

# Electric compressor

SHS-3142 / SHS-3143

Our high-voltage products are designed to serve vehicles propelled by an electric motor in full capacity including heavy-duty trucks, buses, transport refrigeration vehicles and automotive applications.

- Full electric semi hermetic compressor with integrated inverter
- Up to 8 kW cooling capability from 33cc displacement
- Maximum continuous RPM 8,000
- Suitable for R134a refrigerant and R1234yf refrigerant
- Direct mount
- Available CAN or LIN software control
- Compressor voltage, current, power and temperature self-monitoring

## Technical specifications

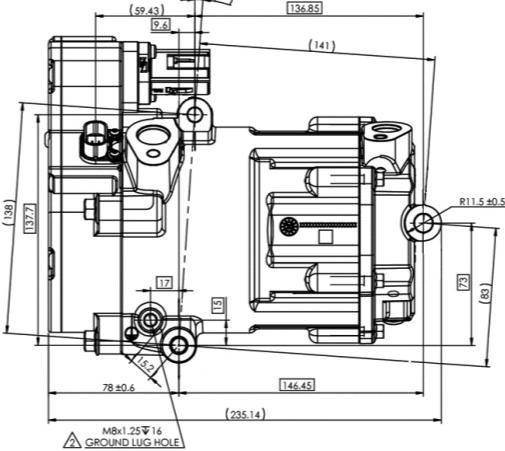

Parameters	Specification
Technology	Scroll (continuously variable speed controlled)
Displacement type	Fixed – 33cc / rev
Refrigerant	R134a and R1234yf
Cooling performance (kW)	> 5*
Operation voltage range (V)	165 – 432
Signal voltage range (V)	8 – 16
Permissible speed (rpm)	800 – 8,500
Operation temperature (°C)	-25 ÷ 120
Communication	LIN / CAN
IP Protection Class	IP6KX, IPX7, IPX9K
Refrigerant connection	flanged type
Oil information	SP-A2 (PAG oil)
Weight (kg)	6.4 (including 120g oil)
Life time (h)	> 12,000
Noise level [dB (A)]	< 64
EMC (UN/ECE R10)	available

\* 5.0 kW at rpm: 5,000 Pd/Ps = 1.5/0.3 MPa SH/SC= 25/10 °K

Order number	Description
6243914B	Compressor 400 V SHS-3142 LIN

6246353A	LV Harness 5 meters
6246352A	HV Harness 5 meters

# Electric compressor

QPE34-850

Our high-voltage products are designed to serve vehicles propelled by an electric motor in full capacity including heavy-duty trucks, buses, transport refrigeration vehicles and automotive applications.

- Full electric semi hermetic compressor with integrated inverter
- Up to 8.5 kW cooling capability from 34cc displacement
- Suitable for R134a refrigerant and R1234yf refrigerant
- Available LIN software control
- Compressor voltage, current, power and temperature self-monitoring

## Technical specifications

Parameters	Specification
Technology	Scroll (continuously variable speed controlled)
Displacement type	Fixed – 34 cc / rev
Refrigerant	R134a and R1234yf
Cooling performance (kW)	8.5
Operation voltage range (V) Full performance	500 – 850
Operation voltage range (V) Reduced performance	450 – 499
Signal voltage range (V)	9 – 32
Permissible speed (rpm)	1,000 – 8,500
Operation temperature (°C)	-40 ÷ 105
Communication	LIN
IP Protection Class	IP6KX, IPX7, IPX9K
Refrigerant connection	flanged type
Oil	PS-R1 (PAG oil)
Weight (kg)	6.3
Life time (h)	> 12,000
EMC (UN/ECE R10)	available

Order number	Description
6247810A	Compressor 800 V QPE34-850 LIN
6246353A	LV Harness 5 meters
6241428A	Kit connectors for LV Harness
6248264A	HV connector 5 meters

## Condensers

### Condensers

Webasto offers a full range of condensers from tube and fin to parallel flow design, available in a variety of mounting features and core sizes. The rooftop condenser units with fans with the performance from 2.8 to 12.5 kW are available in 12 V and 24 V version and are equipped with the relevant receiver drier.

The under chassis and front mounted condensers with the performance from 5 to 14 kW are available with fin pitch of 2.5 mm and 3.5 mm, suitable for agricultural applications or if used in particularly dusty environments; they are also available

in 12 V and 24 V versions and can be supplied with a vehicle-specific installation kit. The HTC and CTSC condensers deliver up to 45 % higher heat exchange than tube and fin condensers with the same dimensions.

### HTC condensers

#### Tube and fin condensers

### CTSC condensers

#### Electroventilated condensers

## Performance of condensers (in kW)

The heat dissipation capacity depends on the size, type and design of the condenser as well as on the air flow through the condenser. The following overview shows the performance depending on the air flow.

Order number	Type	Air flow (m³/h)						
		1000	1500	2000	2500	3000	3500	4000

Condensers

## Evaporators, heater cores

### Evaporators

The evaporator is the component of an AC system that has the function of extracting heat from air injected into the compartment. It comprises one or more tubes, going to the same inlet and outlet fittings, bent in a way as to form a package of rectangular shape with parallel pipes where the refrigerant circulates.

### Heater cores

With the same characteristics as the evaporator coil, it includes only the circuit for the heat exchange with the passage of the glycol solution for the heating function.

## Fans, blowers

### Axial fans

The electric fans improve the air flow through the condenser and the radiator, so that both heat exchangers perform in the best possible way.

### Centrifugal blowers

The centrifugal blowers safeguard the continuous air flow through the evaporator. Powerful motors guarantee a perfect air distribution.

## Air ducts, louvers

### Air ducts

Air ducts are the perfect connection between the AC unit and the louvers. Various air duct variants are available to fit into the specific application. Some models are already equipped with control elements or louvers. The modular system Modulair 1, 2 and 3 can be combined in many different variants.

### Louvers

The louvers or air outlets are final elements in the air ducting system in the compartment. They are used to deflect and adjust the intensity of the air flow.

### Air ducts

### Louvers

**Modulair 1**

**Modulair 1-2**

### Universal air duct for rooftop and under roof AC units

The components are modular and can be combined in many different versions according to the applications and to the vehicle length.

Modulair 1: central air duct for mini buses to contain the evaporator unit.

Modulair 2: central air duct for a rooftop AC unit with central diffuser and front / end extension.

**Modulair 3**

### Universal air duct for rooftop and under roof AC units

The components are modular as well and can be combined according to the mini and midi bus length, above the example of the lateral air duct for the Panama, Madrid and Santana AC units as well as for the new Cool Top 110/140 RT-C and Cool Top 190/220 RT-C series.

The pictures above are exemplary for the various possibilities.

## Receiver dryers, expansion valves

### Receiver dryers

The filter functionalities are essential for protecting the system. They include:

Filtering: the detection of any solid particles drawn into circulation through the refrigerant and the oil, having a diameter equal or exceeding 15 microns.

Dehumidification: the absorption of any humidity in the refrigerant and in the oil at moment of charging or subsequently penetrating in the system through the hose walls or the joint seals.

### Expansion valves

The expansion valve of an AC system performs the following two essential functions:

Drastic pressure, and thus temperature, decrease of the liquid refrigerant coming from the condenser through the receiver dryer. Continuous adjustment of the refrigerant flowing to the evaporator, so that, in the various conditions of thermal load, it can evaporate completely during its traversing, reach a minimal superheating point, yet sufficient to guarantee its arriving in the compressor in vapor state.

## Fittings

### Fittings

Fittings are used for the connection of the hoses. For each application the suitable fitting in terms of type, thread, hose and angle can be selected. In addition points of charge or service ports as well as 2- or 3-way connections are available.

Standard fittings to be used for Manuli Glacier hoses.

Fittings with reduced section to be used for Goodyear Galaxy hoses.

Refrimaster and special fittings to be used for Maflow Artic and Refrimaster hoses.

Ghibli fittings to be used for Ghibli hoses.

	Expansion valve connection	suitable for Fiat Doblo' only in combination with valve 62058027A
	Expansion valve connection	suitable for Fiat Ducato

## Hoses

### Hoses

Refrigerant hoses are available for different refrigerant types and in different diameters and variants.

Air hoses in different diameters and material connect the AC blower with the louvers. For protecting hoses several variants can be selected.

A variety of water hoses, especially for the drain water or glycol (heating function), and its accessory such as fittings, connections and bulbs are provided.

Manuli Glacier hoses to be used for AC systems with standard fittings.

Goodyear Galaxy hoses to be used for AC systems with fittings with reduced section.

Maflow Artic and Refrimaster hoses to be used for refrigeration systems with Refrimaster and special fittings.

Ghibli hoses to be used for refrigeration systems with Ghibli fittings.

## Electrical material

### Solenoid valves, probes, actuators, relays, resistors, switches

All electrical material such as solenoid valves, actuators and thermostats are dedicated to control and protect the complete system or particular components.

### Pressure switches

Pressure switches are electromagnetic devices which have the function of protecting other components from anomalous pressure value and regulating condensation pressure.

### Knobs and silk-screen printings

These devices are integrated in the control panel of the vehicle to control the AC.

### Solenoid valves

### Cabin air filters

Cabin air filters remove contaminants from the air that comes from the outside of a vehicle into the cabin. Thanks to their material they can hold back the pollutants up to the size of 1 micron. In fact, the filter material is a particular micro porous fabric, composed of viscose and cellulose fiber that acts as a sieve.

### Oils

Specific oil types safeguards the lubrication of the compressor.

### Leak detections, AC flushings, Servicing tools

Several tools such as leak detections, AC flushings, crimping machines and special pliers are standard equipment of every workshop to maintain the AC system.

## Leak detections and AC flushings

	<b>Product</b>	<b>Description</b>	<b>Order number</b>
	UV Dye for leak detection	Suitable for leak detection tools. A measurer for one dose is included.	621TP4160A
	AC Flushing kit	This kit consist of a 400 cc sturdy alloy bottle (with valve), hose, pistol, clamp and a container for flushing liquid recovery. It can be used with any suitable cleansing fluid (R141b, ecc) though we recommend 1TP4125. The flushing liquid is pressurised in the alloy bottle using compressed air or nitrogen through the inlet valve. The kit comes in a handy crate, which keeps all the contents together and also keeps the flushing liquid recovery container upright when receiving liquid under pressure. Flushing fluid not included.	621TP41415A
	AC Flushing fluid	This environmentally friendly solvent is non-toxic and contains no polluting substances such as surface- active agents, ether glycol or halogen hydrocarbons. It does not destroy or deform elastomer (rubber) and / or synthetic materials. Its flash point of 70°C makes it much safer to use than benzene based solvents. It allows the evacuation of oil and particles in suspension from the heat exchanger tubes (evaporator and condenser). The solvent drying time is compatible with the normal servicing requirements for AC systems. It is an ideal replacement for CFC-R113 and has excellent cleansing properties and rapid evaporation time. It is compatible with all refrigerants (CFC, HCFC, HFC). Supplied in a 5 l container.	621TP41425A

# Maintenance products, tools

## Servicing tools

Product	Description	Order number
	Hydraulic crimping machine with 8 dies A new crimping machine with 8 dies, to crimp hoses of AC and cooling systems in different sector. The system with 8 dies allows elimination of pressure leak from the fittings. The crimper can be open thus allowing the crimping of special and difficult elbows. Two versions are available, manual pump and integrated piston and with hydraulic handle in titanium alloy, hose and adapter to be matched to the pneumo-hydraulic power unit 621TP41374A.	621TP41574A
	Pneumo-Hydraulic power unit for crimper Meets with CE safety requirements. The unit is pneumatically operated and is activated by a built-in pedal. The unit is connected to a compressed air line using standard couplings and allows work to be carried out at the workbench with no physical effort required.	621TP41374A
	Pliers for Ghibli and Refrimaster For an easy clamping / releasing of Ghibli / Refrimaster hose clamps.	621TP41546A

• Webasto locations

As a global innovative systems partner to the mobility industry, Webasto is one of the 100 largest suppliers to the automotive sector worldwide. In development, manufacturing and sales, the company focuses on roof systems on the one hand and on vehicle electrification on the other hand. The product range includes openable and fixed roofs, electric high-voltage heaters and batteries, as well as thermo management solutions. Among the customers of Webasto are manufacturers of passenger cars, commercial vehicles, and boats, as well as dealers and end customers. In 2023, the Group generated sales of around 4.6 billion euros and employed more than 16,600 people at over 50 locations. The headquarters of the company, which was founded in 1901, is located in Stockdorf near Munich (Germany). For more information, please visit [www.webasto.com](http://www.webasto.com)

# Accessories Catalog Air-Conditioning Solutions

For trucks, light-duty vehicles, mini and midi buses and specialty vehicles

2025

Dear customers, dear Webasto partners,

this Webasto catalog will give you an overview of the complete range of accessories for our air-conditioning systems. On the following pages, you will find everything that you need for installing our rooftop, integrated and transport refrigeration systems. The accessories shown here are clearly laid out to enable you to find and order what you need quickly. Together with the product catalog for heating solutions, catalog will provide a comprehensive source of information so that you can work efficiently with our heating and cooling units.

We wish you great success with our products,

Your Webasto team
